

The 25 <sup>th</sup> Annual Meeting of the Israeli Society for Research, Prevention and Treatment of Atherosclerosis

## Agenda

## Thursday, 24 June 2021

14:00-14:30	Registration	
14:30-14:45	Welcome	
14:45-16:30	Session 1: Risk factors, Covid-19 and Cardiovascular Disease	
	Chairpersons: Dov Gavish   Ronen Durst	
14:45-15:15	Effects of the Covid-19 pandemic on atherosclerosis, thrombosis and cardiovascular compl	ications
	Dov Gavish   Shaare Zedek Medical Center, Israel	
15:15-15:45	Obesity: What have we learned from the COVID-19 virus	
	Dror Dicker   Hasharon Hospital-Rabin Medical Center, Israel	
15:45-16:15	Vitamin D and Omega 3 for CVD and COVID-19 prevention and treatment	
	Sigal Eilat-Adar   Wingate Institute, Israel	
16:15-16:30	Hospital admissions for acute coronary syndrome during the first wave of COVID-19 pande	emic in Israel:
	a single tertiary center experience	
	Maya Wiessman   Rabin Medical Center, Israel	
16:30-17:00	Coffee break	
17:00-19:30	Session 2: A New Era in Lipid-Lowering Therapy	
	Chairpersons: Eran Leitersdorf   Barak Zafrir	
17:00-17:30	RNA-based treatments: an innovative platform for advanced therapeutic opportunities	<b>U</b> NOVARTIS
	Meir Goldsmith   Tel-Aviv University, Israel	
17:30-18:00	Therapeutic approaches to antagonizing PCSK9	<b>U</b> NOVARTIS
	Michael D. Shapiro   Wake Forest University School of Medicine, USA	
18:00-18:30	Lp(a) reduction by PCSK9 inhibitors – what do we (don't) know?	SANOFI 🎝
	Hagai Tavori   Sanofi Aventis, Israel	
18:30-19:00	Eradicating atherosclerotic cardiovascular events by altering the trajectory of subclinical disease	
	Kevin Jon Williams   Temple University School of Medicine, USA	1
19:00-19:30	Racing against the cholesterol clock: HoFH and contemporary treatment options Marcello Arca   University di Roma, Italy	Delivering innovative healthcare
20:00	Dinner	

## Friday, 25 June 2021

08:00-08:45	Registration
08:45-09:00	Welcome
09:00-11:05	Session 3: Diabetes, Obesity and Atherosclerosis
	Chairpersons: Hilla Knobler   Elena Izhakov
09:00-09:25	GLP-1 agonists as an emerging weapon in the battle against atherosclerosis in Type-2 Diabetes 👔 🦉
	Hilla Knobler   Kaplan Medical Center, Israel
09:25-09:50	ANGPTL 3, 4 8 and CIII on lean vs obese kids as well as on intervention
	Alejandro Gugliucci   Touro University-California, USA
09:50-10:15	Lp(a) – An Israeli basic data, and future possible treatments
05100 10110	<i>Ophir Avizohar</i>   Rambam Health Care Campus, Israel
10:15-10:40	Hypertriglyceridemia – a cause or a biomarker for atherosclerotic cardiovascular disease?
10.15 10.40	Rom Keshet   Sheba Medical Center, Israel
10:40-11:05	The value of COLT 2 in hith terms in Adheneousle
10.40-11.05	Subodh Verma   University of Toronto, Canada Bl
11:05-11:30	Coffee Break
11:30-13:00	Session 4: Nutrition and Lifestyle
11.30-13.00	•
11.20 12.00	Chairpersons: Iris Shai   Ophir Avizohar
11:30-12:00	Is greener better? MRI and microbial insights from the DIRECT PLUS Trial
12.00 12.20	Iris Shai   Ben-Gurion University, Israel
12:00-12:30	Are therapeutic lifestyle changes good enough for lipid lowering?
12:30-13:00	Yehuda Kamari   Sheba Medical Center, Israel The emerging field of gulineary modifies a what does the grience clearly show
12.30-13.00	The emerging field of culinary medicine - what does the science clearly show
	Rani Polak   Sheba Medical Center, Israel
13:00-14:45	Session 5: Short Presentations of Young Investigators
13:00-14:45	Session 5: Short Presentations of Young Investigators Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari
13:00-14:45 13:00-13:15	
	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari
	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis,
	<i>Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari</i> TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype
13:00-13:15	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel
13:00-13:15	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks
13:00-13:15	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue
13:00-13:15 13:15-13:30	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel
13:00-13:15 13:15-13:30	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol
13:00-13:15 13:15-13:30	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel
13:00-13:15 13:15-13:30 13:30-13:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer
13:00-13:15 13:15-13:30 13:30-13:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial Gal Tsaban   Ben-Gurion University, Israel
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial Gal Tsaban   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial Gal Tsaban   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15 14:15-14:30	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype <i>Nitzan Maixner</i>   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue <i>Yulia Haim</i>   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol <i>Mohammad Mowaswes</i>   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer <i>Rahaf Salalha</i>   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial <i>Gal Tsaban</i>   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry <i>Tzlil Grinberg</i>   <i>Rabin Medical Center, Israel</i>
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15 14:15-14:30 14:30-14:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype <i>Nitzan Maixner</i>   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue <i>Yulia Haim</i>   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol <i>Mohammad Mowaswes</i>   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer <i>Rahaf Salalha</i>   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial <i>Gal Tsaban</i>   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry <i>Tzlil Grinberg</i>   <i>Rabin Medical Center</i> , Israel <b>Rafael Bitzur Prize for Young Investigators</b>
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15 14:15-14:30 14:30-14:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial Gal Tsaban   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry Tzlil Grinberg   Rabin Medical Center, Israel Rafael Bitzur Prize for Young Investigators Lunch
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15 14:15-14:30 14:30-14:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype <i>Nitzan Maixner</i>   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue <i>Yulia Haim</i>   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol <i>Mohammad Mowaswes</i>   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer <i>Rahaf Salalha</i>   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial <i>Gal Tsaban</i>   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry <i>Tzlil Grinberg</i>   <i>Rabin Medical Center</i> , Israel <b>Rafael Bitzur Prize for Young Investigators</b>
13:00-13:15 13:15-13:30 13:30-13:45 13:45-14:00 14:00-14:15 14:15-14:30 14:30-14:45	Chairpersons: Andrea Szuchman-Sapir   Yehuda Kamari TL1A(TNFSF15) induces human macrophage lipid accumulation by stimulating de-novo lipogenesis, contributing to a high cardiometabolic risk obesity phenotype Nitzan Maixner   Ben-Gurion University, Israel Single-nucleus RNA-SEQ uncovers adipocyte and other cell sub-populations and paracrine networks of human adipose tissue Yulia Haim   Ben-Gurion University, Israel SLC10A2 gene mutation manifested by chronic diarrhea and hypertriglyceridemia treated successfully with Colestipol Mohammad Mowaswes   Hadassah Medical Center, Israel The methylation - microRNA - gene expression axis linking obesity and cancer Rahaf Salalha   MIGAL Galilee Research Institute, Israel The effect of green-Mediterranean diet on cardiometabolic risk; a randomized controlled trial Gal Tsaban   Ben-Gurion University, Israel Management and clinical outcomes of particularly high-risk patients for recurrent cardiovascular events after an acute Coronary Syndrome- The ACSIS registry Tzlil Grinberg   Rabin Medical Center, Israel Rafael Bitzur Prize for Young Investigators Lunch

- 1. Clinical Case Studies in Cardiovascular Medicine: Heart Failure and Hypercholesterolemia
- 2. Update on the new Israeli guidelines on Atherosclerosis, HoFH and Nutrition
